Part 2 Terms of Reference

1. Background

Partnerships for Forests supports investment models in which the private sector, public sector and communities can achieve improved returns from sustainable forests and sustainable land use. By creating market-ready 'Forest Partnerships' that offer an attractive balance of risks and benefits for the private sector, public sector and communities, the programme aims to mobilise significant investment, principally from the private sector.

In Brazil, Partnerships for Forests is supporting Aliança da Terra SA with the aim to develop its Sales and Marketing plan. The Producing Right Platform (PRP) is a database of rural properties supporting producers, companies and consumers to establish a more sustainable supply chain. It is managed by Aliança da Terra SA. In summary, the dynamics of PRP work in the following way: (i) rural producers face challenges to comply with social and environmental laws and PRP provides technical assistance using best practices to encourage a more sustainable and responsible production; (ii) market players (companies) face challenges to evaluate the sustainability of their supply chains and PRP provides them with information and a sustainable network of rural producers, and (iii) PRP helps consumers to identify products from responsible sourcing by providing a stamp to be used on food items available in the supermarkets.

The platform protects the forest and create social benefits assisting rural producers to improve social and environmental conditions in their properties, through in situ diagnostics, monitoring and a roadmap with technical assistance for improvements. Currently, 5 million hectares are under PRP's monitoring, and 2.4 million hectares of them are protected areas. The platform have already leveraged approximately £ 16 million in social-environmental improvements.

Part 4 Technical Assessment and Selection Criteria

1. Technical Submission.

1.1 The Technical Assessment places emphasis on the degree of confidence the Procurement Committee has in the Tender content and the Tenderer's ability to deliver the services effectively. A high degree of confidence is gained where:

- 1.1.1 A deep understanding of key issues is clearly demonstrated. Merely providing general statements of information and a can-do attitude will not generate high scores.
- 1.1.2 A convincing methodology is provided to achieve results, whilst ensuring optimal value for money over the lifetime of the contract. The methodology should demonstrate how value for money will be achieved and include clear links between performance outputs and pricing mechanisms (such as milestones for payment linked to clear deliverables).
- 1.1.3 The methodology includes monitoring & performance management tools where appropriate, such as: critical path analysis, risk strategies/mitigation plans, communications plans etc.
- 1.1.4 A detailed Work Plan is provided that breaks down activities and outputs, which are clearly cross referenced (where appropriate) to the level of effort of the Nominated Personnel, payment mechanisms and governance/quality assurance mechanisms to ensure effective delivery on time and within budget.
- 1.1.5 Strong examples demonstrate the proposed methodology has been applied successfully in environments relevant to the TOR.
- 1.1.6 A well balanced team of Nominated Personnel is proposed that provides the right mix and level of skills, with assured availability at the right time and with the right number of days.
- 1.1.7 Greater effort has been made to provide certainty in the Tender detail so that it can be relied on from a contractual perspective (for example, poor management processes, lack of performance measures and vague terminology represent a potential performance risk).

1.2 The following selection criteria and weighting will be used in the assessment process to assess the technical capacity of the Tenders.

Scoring matrix for the technical submission	
5	Excellent, addresses the requirements of the TOR and all ITT issues, and where relevant demonstrates fine tuning, to make a match with Client expectations, and is of a quality and level of detail and understanding that provides confidence in certainty of delivery and permits full contractual reliance (where applicable).
4	High degree of confidence that they can meet the requirements of the TOR (and where relevant strong evidence they have tailored their response to meet these). Demonstrates they have a thorough understanding of what is being asked for and that they can do what they say they will; translates well into contractual terms (where applicable).

3	An understanding of all issues relating to delivery of the TOR and tailoring the response to demonstrate that proposals are feasible so that there is a good level of confidence that they will deliver; can be transposed into contractual terms (where applicable).
2	Understands most of the issues relating to delivery of the TOR and addresses them appropriately with sufficient information, but only some relevant tailoring and so only some confidence that they will be able deliver in line with expectations.
1	Some misunderstandings of the issues relating to delivery of the TOR and a generally low level of quality information and detail. Poor appetite to tailor when asked and so fails to meet expectations in many ways and provides insufficient confidence.
